## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite because of the "whereby" clause, since "whereby" does not positively set forth a step. Claim 1 is indefinite because the terms "fat-reducing" and "fat-emulsifying" bacteria lacks positive antecedent basis. Additionally, it is unclear what is meant by these terms. Claim 1 is indefinite because it is unclear whether the liquid drain cleaning agent, the solid drain cleaning agent, or both are added to the drain pipe. Additionally, are the nitrogenous compounds different from that of urea. Claim 1 is indefinite because of the "and/or", "preferably", "particular" clause. It is also unclear what is meant by "waterless magnesium sulfate", growth factors", "supplines", and "germ-inhibiting organic material". Claim 1 is indefinite because it is unclear what one of ordinary skill in the art would consider as a "large extent". Claim 1 is indefinite because it is unclear whether the "fatty waste water" refers to the bacteria.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1746

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Murtaugh (3965048).

Murtaugh teaches a drain cleaner for dissolving soap curd containing fatty substances (col. 1, lines 15-18, col. 4, lines 25-27) using urea. In view of the indefiniteness, as described above, the limitations are met by Murtaugh.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Young (4993442).

Young teaches a drain cleaner for dissolving soap residue (col. 1, lines 30-35, col. 10, lines 1-3) using urea. Soap residue is a fatty acid ester, and in view of the indefiniteness, as described above, the limitations are met by Young.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Osipow teaches a carbamide detergent. York teaches a detergent composition. Rogers teaches a drain cleaner. Young teaches cleaning conduits with urea. Becker teaches a sanitizing cleaner using urea. Becker teaches a detergent. Golovanov teaches a pipe cleaner using carbamide.
